

Appl. No. 10/008,566
Amdt. dated April 19, 2004

This listing of claims will replace all prior versions, and listings, of claims in our amendments or responses to Office actions.

Listing of Claims:

Claims 1-21 (previously cancelled)

Claims 22-42 (canceled)

Claim 43 (new) An isolated or purified expression vector comprising a first polynucleotide operably linked to a first promoter, wherein the first polynucleotide encodes a polypeptide of the amino acid sequence set forth in SEQ ID NO: 2, and a second polynucleotide operably linked to a second promoter, wherein the second polynucleotide encodes a polypeptide of the amino acid sequence as set forth in SEQ ID NO: 4.

Claim 44 (new) An isolated or purified host cell comprising the expression vector of Claim 43.

Claim 45 (new) A method of making a heterodimeric receptor complex of the polypeptides of amino acid sequences as set forth in SEQ ID NO: 2 and SEQ ID NO: 4, comprising culturing the host cell of Claim 44 under conditions suitable for expression of the heterodimeric receptor complex.

Claim 46 (new) The method of Claim 45, wherein the heterodimeric receptor complex, when expressed, binds a polypeptide of the amino acid sequence as set forth in residues 1-131 of SEQ ID NO: 6.

Claim 47 (new) An isolated or purified host cell transfected with a first expression vector comprising a nucleic acid encoding a polypeptide of the amino acid sequence set forth in SEQ ID NO: 2, and a second expression vector comprising a nucleic acid encoding a polypeptide of the amino acid sequence set forth in SEQ ID NO: 4.

Appl. No. 10/008,566
Amdt. dated April 19, 2004

Claim 48 (new) The host cell of Claim 47, wherein the first expression vector and the second expression vector are retroviral vectors.

Claim 49 (new) The host cell of Claim 48, wherein the retroviral vectors are pMX retroviral vectors.

Claim 50 (new) A method of making a heterodimeric receptor complex comprising culturing the host cell of Claim 46 under conditions suitable for the expression of the heterodimeric receptor complex.

Claim 51 (new) The method of Claim 50, wherein the heterodimeric receptor complex, when expressed, binds a polypeptide of the amino acid sequence set forth in SEQ ID NO: 6.
